ABOUT THE PRODUCT

4-XLT is a multi-use, polymer fortified adhesive built on the new LATICRETE Water Dispersion Technology (WDT) platform. WDT provides for the complete dispersion of water within the mix allowing users to quickly and easily achieve the desired application consistency. 4-XLT offers tremendous utility including non-sag wall installations as well as non slump medium bed build up of up to 19 mm and thin-set applications on floors.

In addition 4-XLT features LATICRETE DUST LOCK™ Technology. This unique way of manufacturing our adhesives dramatically reduces mess both during transportation of the product as well as during mixing. Meets and exceeds the requirements of AS4922.1 as a C1TS1 classification adhesive.

Conditions apply. Only at participating LATICRETE stockists. Check with your local stockist for the expiry date for this promotion.
